GAIA -- Graphical Astronomy and Image Analysis Tool

Welcome to the on-line help system. For help on any of the topics shown below, click on the associated hyperlink. Descriptions and pointers to other sources are available in the main GAIA documentation, Starlink User Note 214 (SUN/214). This can be view on-line either by using the command:

```
% showme sun214
```

Any unresolved questions or requests for enhancements should be forward to:

```
gaia@star.rl.ac.uk
```

Help topics

The help is roughly divided into three areas, those of an image display tool, those provided for the analysis of images and those for querying on-line resources (catalogues of images and data).

If you open a toolbox (i.e. a pop-up window) that has some specific help associated with it you'll see a "Help" menu in the top-right corner.
